

# Sutton Data Sheet

The ever-popular Sutton seat was designed around our acclaimed chair shell. Providing both superior comfort and fantastic value for money, the Sutton is an excellent choice.

The Sutton has exceptional durability thanks to several key features. Our framework comes hot-dip galvanized and black-coated as standard, providing superior rust protection, minimising maintenance and ensuring the Sutton's long-lasting good looks. The polypropylene material includes UV additive as standard, protecting colour from fading or sun damage. The counterbalanced mechanism ensures the seat automatically returns to the upright position when unoccupied, improving spectator flow.

## Sutton Data Sheet

**Built to Last, Event After Event:** Crafted with high-quality UV polypropylene, the Sutton shrugs off daily wear and tear. This resilient material is complemented by a smooth finish.

**Seamless Spectator Flow:** The Sutton features a counterbalanced action that effortlessly returns the seat to an upright position after use. This allows for smooth crowd movement and ensures a clean, organized viewing experience for everyone.

**Ready for Any Environment:** Whether you're facing the elements or needing a specific seating configuration, the Sutton adapts. The seat and back are moulded with a recess for seat numbers, and UV stabilizers are included as standard for added protection and long-lasting aesthetics. The steel framework is hot dip galvanised and black coated as standard – ensuring minimal risk of rust and retaining fantastic structural strength. The Sutton is built to withstand anything your venue throws its way.

### To Note:

Floor or wall fixings are not included as these vary depending on the material, condition etc of where the seat is to be installed.

Seat Assembly required. The seat **MUST** be fixed to a stable structure with appropriate fixings to be a useable seat.

Assembly and installation instructions provided.
